*1 Metallic silver ink should only be used on garments as a spot colour as mixing it with other colours will negatively impact washability.
*2 Three year outdoor durability is based on accelerated weather tests conducted by Roland DG. Results may vary depending on the location and application. Some applications, including vehicle graphics, may require lamination.
*3 Ink type must be selected at the time of purchase.

Roland Professional Print Management Software Included

Roland Metallic Color System Library

Roland VersaWorks® supports Adobe® Illustrator®, CorelDRAW® and other popular design software packages. Choose from a wide variety of layout functions including scaling, cropping, rotating, auto layout and tiling to optimise your print media. VersaWorks also features Roland Color System Libraries for accurate colour matching of traditional and metallic colour, and variable data printing which allows you to efficiently create a series of signs, labels and name badges in which the text and graphics change from one print to the next.

About Metallic Silver Ink

Due to the nature of the metallic silver ink, the pigment in this ink will settle in the cartridge and ink flow system, requiring you to shake the cartridge before each use. Outdoor durability is three years for CMYK inks, one to three years for metallic silver ink, depending on the media used. Roland strongly recommends lamination for both indoor and outdoor graphics to ensure the quality of metallic silver ink.
